## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eisenbraun (U.S. Patent # 6,551,142) in combination with Munroe et al. (U.S. patent # 6,805,300 B2).

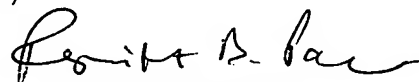

Eisenbraun disclose the claimed invention a multifunction car charger connector (figure 1 and 3-4), including a pedestal in a body structure to have a charger connector connecting to the cigarette lighter and shell attachment (figure 4, item 16). Eisenbraun does not disclose the utilization of the technique for the shell attachment having a conductive plate to connect to the circuitry. Mnuroe et al. teaches the utilization of the similar technique for the shell attachment having a conductive plate to connect to the circuitry (figure 1-4), it would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Eisenbraun's cigarette lighter connector by utilizing the technique taught by Munroe et al. for the purpose of providing improved air freshening device with charger.
